DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakatsuno (4,901,534). Nakatsuno discloses a defrosting refrigeration system for an outdoor heat exchanger and comprising: a compressor (1) adjacently arranged with a four-way valve (2), an outdoor heat exchanger (5), an indoor room heat exchanger (3) with an electric expansion valve(4) located upstream, a bypass circuit line (6) with a two-way valve (8) for controlling refrigerant to said outdoor condenser unit and whereby an air conditioner apparatus for heating the room, allows opening and closing of bypass circuit valve for defrosting of said outdoor heat exchanger unit (see column 2 & figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nakatsuno in view of Yoshida et al. (6,244,057). Nakatsuno discloses the claimed

invention above but lacks a plurality of outdoor units in parallel. Yoshida teaches an air conditioning system with a four-way valve & a branch pipe and consisting more importantly of a plurality of outdoor units. Therefore it is deemed by examiner, that it would have obvious to one having ordinary skill in the art at the time the invention was made to incorporate a second or third outdoor unit as disclosed by Nakatsuno for the purpose of reducing power consumption and eliminating defrost accumulation.

Allowable Subject Matter

Claims 9-11 are allowed over the prior art of record.

Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
